

Hope for Street kids

You can find Street kids everywhere in the world - 1,5 Mio are living in the Philippines. They beg at red traffic lights, sell cigarettes in the streets, steal in stores and sleep on the streets. Society rejects them and they are marked as criminals or bothersome.

They are driven to the streets due to brokenness in the family, hunger, violence, abuse or neglect. In the streets they are running into greater problems like drugs, crime, poverty, abuse and violence. It is very difficult for them to escape without any help from outside.

Christ for Asia Int. offers help to these kids!

A team of employed staff, house parents, teachers, social workers, missionaries and young volunteers are serving in different areas:

Family-Center

In the Family Center in downtown Cebu City, families in need are given holistic support. In addition to feeding the poor, social programs are also offered: imparting training opportunities, help people to stand on their own, promoting talent, etc. In addition, alpha courses and home groups give impulses for a life with God.

Nehemiah Homes

Former Street kids can find a home where they are accepted, cared for, valued and have a sense of belonging. They can work through their traumatic past and find hope and a future. We want to give protection to these young people like Nehemiah to his people in ancient days in building a wall around Jerusalem.

We run a Nehemiah Boys- and Girls' Home with 36 slots each. They live together with their house parents in four family units.

Nehemiah School

Education provides a way out of poverty. In the Philippines education costs quite some money. Our kids from the homes and some from the streets or squatters can get free education and have the chance to graduate.

We have Elementary and High school up to 4th year. They study in small groups and will be assisted individually. Their talents will get promoted. The school is accredited by the Department of Education.

Some further programs of CFAI are a farm project, a prison ministry and different relief operations after calamities.
